Functional and Oncology Uroandrology. The Point of View of World Experts

18th-19th January , 2024

Merchants Club - Gedimino pr. 35 Vilnius, Lithuania

RATIONALE

In recent years, urology and andrology have made great progress in terms of medical and surgical therapies. Medical therapies have gone in the direction of finding drugs against so-called orphan pathologies or with ineffective therapies such as chronic pelvic pain, induratio penis plastica and premature ejaculation. There has also been a development of new oncological drugs such as in prostate cancer. As regards surgery, there has been a great development of new techniques thanks also to biomedical technology.
For two days, great world experts will discuss the reality of urology in Lituania for an exchange of scientific information where there will be plenty of space for discussion.
